WORK HISTORY

Megainsight SIA - Full-Stack Developer
Mar 2023 - Sep 2024
Senior PHP/Vue developer
I primarily worked on optimizing API requests, identifying bottlenecks, creating queue systems for handling millions of user messages, indexing tables, analyzing queries (using EXPLAIN), partitions, and normalization.
In the team, we used the Laravel framework. I adhered to PSR-12 standards, strict_types, and documented the code.
I also participated in the Keeptip startup, where I developed API endpoints, integrated payment systems like **Stripe** and **Revolut**, and worked on the architecture.

SIDES GmbH - Back-End Developer
Mar 2022 - Feb 2023
PHP developer
The organization provides restaurants, markets, and other small businesses with POS services. Here, I often worked with TCP/IP protocols, ensured real-time price transmission via WebSockets, created subscriptions for various events, managed caching and sessions, and dealt with garbage collection. I delegated heavy requests to proxy servers and monitored performance.

MYGE - Back-End Developer
Feb 2019 - Jan 2022
PHP developer
Primarily, I worked on APIs and databases, fixed bugs in existing code, and delivered new features. In my daily work, I frequently used PHP OOP, Laravel, SQL, GraphQL, ReactJS, Git, Jira, unit testing, the Agile framework, and Slack.

CERTIFICATIONS

Certificate in Cyber security
Business & Technology University
2021

Certificate in Business & Finances
Georgian National University
2020

Certificate in Web Development
Intellect center
2017

EDUCATIONAL BACKGROUND

Georgian Technical University
IT
2020 - 2022

Moscow Institute of Physic & Technology
Algorithms & Data structures
2020

Intellect Center
Web development courses
2016-2017

SKILLS & PROFICIENCIES

- Strong analytical & problem solving skills
- Lean, Agile, Scrum and Kanban frameworks
- Strategic thinking and planning skills

TECHNICAL SKILLS

Front-End

- HTML5
- CSS3
- JavaScript - jQuery, ReactJs, VueJs
- Dart - Flutter

Back-End

- PHP, Symfony **7.x**, Laravel **5.1 - 11.x**
- MySQL, PostgreSQL, MongoDB, SQL, NoSQL
- AWS, GCP, Firebase, Cloud microservices
- RabbitMQ, Kafka, Sockets
- Redis, memcached
- Docker, kubernetes
- ClickHouse

General

- Algorithms & Data Structures
- Big O
- OOP - SOLID principles + 24 Design patterns
- Clean Architecture & Clean code *by Robert Martin*

Other

- KISS, SOLID, DRY methodologies
- Concurrent, Functional programming
- REST/SOAP API, TCP/IP Sockets
- MVC, MVVM, Lifting State
- TDD, BDD approaches
- GIT, Jira, Codemagic, CI/CD, Zoho
- A/B testing + User behavior analysis

TECHNICAL FOCUS

- PHP 8.4 PSR-12 strict types.
- Performance optimization, Garbage collection, Queue management, Caching, Patterns.
- Load balancing, Proxy servers, Cloud services.
- SQL, Query optimization, EXPLAIN, Indexing, Partitions, Procedures.
- Payment gateways, 3rd party API integration HTTP/s TCP/IP.
- Bottlenecks, Code analyzing.

RECOMMENDATIONS

Megainsight SIA

Evgeny (CEO)

Evgeny Strokin · 1st
CEO & Co-Founder - Megainsight | Helping retailers raise net profits 3X 🚀 through automation of personalised offers
August 7, 2024, Evgeny managed Luka directly

I've had the pleasure of working closely with Luka on numerous projects and startups. One of the m professional, communicative, and responsible person I've met. Thank you for your service! I hope w the opportunity to work together again in the future.
